Language : C, C++, core JAVA, PHP, JavaScript, Python

Operating System : Windows XP/7/8/10, LINUX

Web Technologies : HTML,CSS,JAVASCRIPT,JQUERY,Ajax, Bootstarp,WordPress,Node.JS,AngularJS

Database : MySQL, MongoDB, Postgresql

PHP Frame Works & CMS : CodeIgnitor,Laravel,Wordpress,Magento

Version Control System : GitHub, BitBucket

Digital Marketing : SEO, Google Webmaster tool, Google Analytics , Affiliate marketing, Social Media Marketing

Projects:

1. Name: City Directory
Technology: PHP MVC Framework
Duration   : July 2018 – August 2018

Description: It is actually an application which provides listing of different categories like banks, theatres, hospitals, clubs around you by fetching your current location. In this project I developed REST APIs to fetch data and admin panel so owner of the app can change images, order of listing, add new category and also set/unset is featured option for listing a specific place.

2. Name: Leave & Attendance Management System (LAMS)

Technology: PHP MVC Framework

Duration   : August 2018 – December 2018

Description: It is centralised web based HR system we designed for a company which is having its employee strength around 10,000 all over the country. In this portal employee can apply leave, view their attendance, on other hand manager or HR view record of particular employee as well as their team. In apply leave module there is bunch of leave types and its rules which is the most challenging part of this project so far.

3. Name: IOT Device with Cloud Connectivity

Technology: Node.js , PHP

Duration   : December 2018 – April 2019

Description   : This is a hardware device with server connectivity. Which can be use by the large companies to train their new stafff. New hires can ask their taks or complete training with help of the device. Device will response accordingly from the available data in the server and covert into audio. For this project I had developed APIs which convert human voice into text and check data in the server than respond accordingly and SAAS based Admin Panel to connect with device users.

Achievements and Certification:

- Learn to built Android multi screen application from the course on Udacity.com (June 2017)
